

# Graduate Program

## M.S. and Ph.D. Programs in Civil Engineering

The Department of Civil Engineering offers graduate programs leading to the degrees of Master of Science in Civil Engineering (M.S.), Master of Science in Construction Technology and Management (M.S.) and Doctor of Philosophy (Ph.D.), in Civil Engineering. The associated areas of study include: Construction Materials, Construction Technology and Management, Geotechnical Engineering, Hydraulic Engineering, Transportation Engineering. An active research program is conducted in each of these areas and it is the goal of the department to maintain a close association between graduate study, research, teaching and engineering practice.

## Admission Requirement

Civil Engineering graduates holding B.S. or M.S. degrees of recognized Universities may apply to join the M.S. or Ph.D. programs, respectively. Qualified candidates from other engineering disciplines and Department of Architecture are also encouraged to apply, however, these students will be required to complete successfully a number of core courses before full admission.

## Research Facilities

The Department of Civil Engineering has several laboratories which can be used to perform a wide variety of graduate research projects. These include laboratories in areas of Construction Materials, Geotechnical Engineering, Hydraulic Engineering, Transportation Engineering and Structural Engineering. In addition, the department has modern computing facilities including a number of personal computers, workstations and software.
